WHO WE ARE: A program of the UNTHSC Geriatrics Division, funded by the Donald W. Reynolds Foundation and UNTHSC to address a national shortage of Geriatricians and the medical needs of a growing geriatric population.

OUR GOAL: Development and implementation of an innovative and sustainable program to strengthen physicians' training in geriatrics.

TARGET GROUPS: TCOM Osteopathic Medical Students Years 1-4
TEXAS OPTI Residents

FACULTY: Texas OPTI Residency Program Directors
ROME (Rural Osteopathic Medicine Education)
PRACTICING PHYSICIANS throughout Texas

OUR Objectives:

1. Development and Implementation of an integrated geriatrics curriculum across all four years of the medical education.
2. Osteopathic residents training throughout Texas will have access to an integrated geriatrics curriculum.
3. **Rural Osteopathic Medicine Education Faculty and Osteopathic Postgraduate Training Institution Program Directors** will have access to a geriatrics faculty development program.
4. In collaboration with the UNTHSC Professional and Continuing Education Department (PACE), the GET-IT program will help develop geriatrics continuing medical education programs for practicing physicians.

How We Can Help: We can provide resources for geriatrics education free of charge: PowerPoint Presentations, Geriatrics Facts Sheets, Podcasts, Geriatricians to speak to your students and residents on Geriatrics topics (local Fort Worth area). If you would like further information please contact David Farmer PhD at David.Farmer@unthsc.edu or Yolanda Pitts MEd at Yolanda.Pitts@unthsc.edu for a list of available educational resources.

We would like your feedback on geriatrics topics of interest for faculty and residents. You are invited to participate in a brief research survey about aging and healthcare with older adults. "Geriatrics and Gerontology Knowledge and Skills" takes approximately fifteen minutes to complete. It has been designed to collect information about your level of confidence in your knowledge and skills related to caring for older adults. Areas of low and moderate confidence are considered target areas for educational programming. You can access this survey on-line by visiting <http://survey.hsc.unt.edu/GERIKandS>.
